

**USER INSTRUCTIONS**  
MeterMade 16 and 25 tools

Designed to trim existing meter tails  
or strip new 16mm<sup>2</sup> and 25mm<sup>2</sup> cables

Slide the switch so the white dot is visible when  
preparing cables to fit TELLTAIL cable markers

Slide the switch so the white dot is NOT visible  
when stripping cables to suit service cut-outs,  
isolators and connector blocks

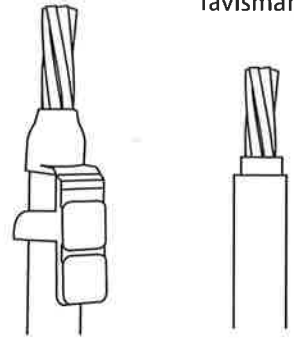

To trim or strip  
the outer sheath...

Insert the cable  
into hole 1 then  
rotate and push  
MeterMade until  
the strip is complete

To trim or strip  
the inner insulation...

Insert the cable  
into hole 2 then  
rotate and push  
MeterMade until  
the strip is complete

**REMEMBER**

Slide the switch so the white dot is visible  
for the correct strip dimensions to suit  
TELLTAIL cable markers

and slide the switch so the white dot is NOT  
visible for the correct strip dimensions to  
suit service cut-outs, isolators and  
connector blocks

**NOTE**

For the best stripping results ensure the cable  
ends are straight before using MeterMade
